88kg No-Gi Jiu-Jitsu Rankings

The biggest shakeup up to the rankings after No-Gi Pans happened in the 88kg category.

With number 1 ranked Gordon Ryan competing up at Ultra-Heavy, the field was open for someone to make a move.

Dante Leon moved up a spot with his second consecutive No-Gi Pans gold medal at 88kg, and silver medalist Michael Trasso gets added to the list.

Marcos Tinoco and Nick Calvanese, two hardened veterans also join the ranks with a gold and silver medal performance, respectively.

And finally, Craig Jones decision victory over Matheus Diniz in the UK sees him jump the MG black belt to number 5.

Note: The 88kg division consists of what would be considered the middleweight and medium-heavyweight division in the gi. We did this because many events have weight classes around these weights but not specifically at the 79.5 and 85.5kg divisions under IBJJF rules.
